PIKESVILLE IMPROVEMENT CORPORATION

The Pikesville Improvement Corporation is a nonprofit community-based organization established in January 2025 dedicated to the revitalization of Pikesville in line with the Revitalization Action Plan adopted into Master Plan 2030. Our strategic vision is to work towards a SAFE, CLEAN, WALKABLE, and VIBRANT downtown. Our active members are residents from over 30 communities surrounding our downtown core from the City line to beyond the Beltway between Greenspring Avenue and Liberty Road. We represent the broad diversity of this area. PIC's focus for the past year has been to work with County and State officials and our local communities and businesses to address significant concerns with pedestrian and vehicular safety along both state and county roads and to collaborate with our sister organizations to make downtown Pikesville a more vibrant and inviting destination. We are grateful for the operations support from the County Departments that we have been working with enabling PIC to make visible progress and will submit a list of specific capital improvements that we believe will support the Revitalization Plan in writing before the deadline.

Respectfully submitted

Tom Fekete, Vice President

Pikesville Improvement Corporation
